ROADSENSE

We are frustrated. They have a license. But who gives way?

Cutting into lanes.
Ignoring crossings.
Blocking junctions.

WE WILL HANDLE

AI-generated concept artwork

Practice for real traffic

VEHICLE CONTROL

Braking and turning

ROAD DECISIONS

Notice people. Know who goes first. Give way when it matters.

The 2023 reform replaced zig-zags and figure-eight tracks.

Road crashes cost Indonesia

About

Rp450

trillion a year

Hospital bills. Lost income. Lost lives.

3%

of GDP, roughly

2020 economic baseline

Source: Perpres 1/2022, annex p. 1. Estimate uses 2020 GDP.

What a 1% reduction could mean

Rp4.5

trillion a year

We have not proven that impact yet. It shows why better road training matters.

RoadSense A driving game for practising real road situations.

Calculation: 1% of the rounded Rp450 trillion baseline. Perpres 1/2022, annex p. 1.

Pasar Bunga

Pedestrian crossing
Junction priority

Earlier prototype capture; scene detail only

Mistake. Explanation. Example. Retry.

Built with Codex

Indonesian traffic rules become situations people can practise.

01

Driving game

Road situations and vehicle actions.

02

Rule checks

Check the action against the rule.

03

Explanations

What went wrong and what to do.

04

Tests

Check the result stays consistent.

The game labels legal rules and safety advice separately.

Where RoadSense could help

01 / LICENSING

Before the driving test

A required learning step,
if licensing authorities adopt it.

02 / DRIVER PARTNERS

Gojek or Grab

Training for new drivers.
Refresher lessons for existing drivers.

---

03 / DRIVING SCHOOL

First: a driving-school or driver-group pilot

Fewer repeat mistakes? Better decisions in new situations?
Safer driving afterward?

Proposals for validation; no licensing or platform partnership is claimed.

ROADSENSE

Learn to give way before someone else pays for your mistake.

We are looking for a partner
to test this with real learners.
