ROAD SAFETY PRACTICE / INDONESIA

RoadSense

Practice the decision.
Before the road.

A playable learning prototype

WE WILL HANDLE

Hackathon pitch

AI-generated concept artwork

A crossing.
A decision.

Knowing the rule is a start.
Choosing when to act takes practice.

When is it safe to move?

AI-generated concept artwork

A mistake becomes another attempt

The prototype connects each decision to a way to try again.

01

Drive

Make a decision in a road scenario.

02

Feedback

See what happened and the relevant rule.

03

Example

Watch the correct driving action.

04

Retry

Apply it in another attempt.

A second chance, with a reason to change.

Live demo

90

seconds

Brake. Wait.
Continue when clear.

Actual prototype scene detail, cropped from an earlier capture

The live build shows the tutorial and feedback.

Familiar streets.
Different responsibilities.

Car

Seat belt

Motorcycle

Helmet and headlight

Village, school and market scenarios

AI-generated concept artwork

A playable prototype

Short practice sessions and a longer journey.

5

Skill tests

Focused practice
for individual skills.

3

Everyday missions

Village shopping, school crossing
and market passenger pickup.

10

Journey stages

Preparation through
an ambulance encounter.

Car and motorcycle progress stay separate.

Does practice change the next decision?

Learning impact is not yet measured.

Next: observe first-time players,
then compare decisions in a new scenario.

PLANNED EVALUATION

01 First attempt

Observe the initial decision.

02 Practice

Use feedback, example and retry.

03 New scenario

Check the next decision.

ROADSENSE

Every road decision deserves practice.

Try the prototype.

WE WILL HANDLE

Thank you
